

To change the Stats properties for team sort order do the following:

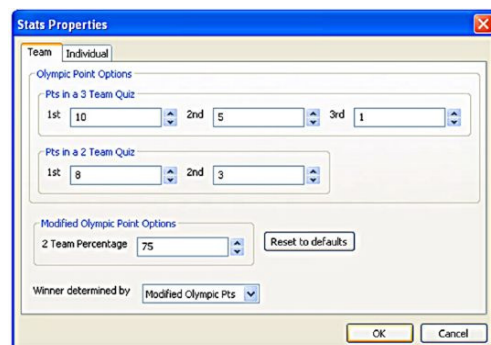

On the Stats file you want to change (obviously, it must already be setup), right click while it is highlighted.

You should now see this screen:

Select the Properties option.

At this point, you can make any adjustments necessary. In the lower part of the window is where you choose how the winner is determined: Win/Loss, Olympic Points or Modified Olympic Points. You can also choose how many points each place gets for 1st, 2nd and 3rd in a 3 team quiz or a percentage. Same with a 2 team quiz.
